TOMC Memory

Free software. Open source. Strong results at 10M tokens.

MIT LICENSE · CPU PREPARATION · NOV 03, 2026

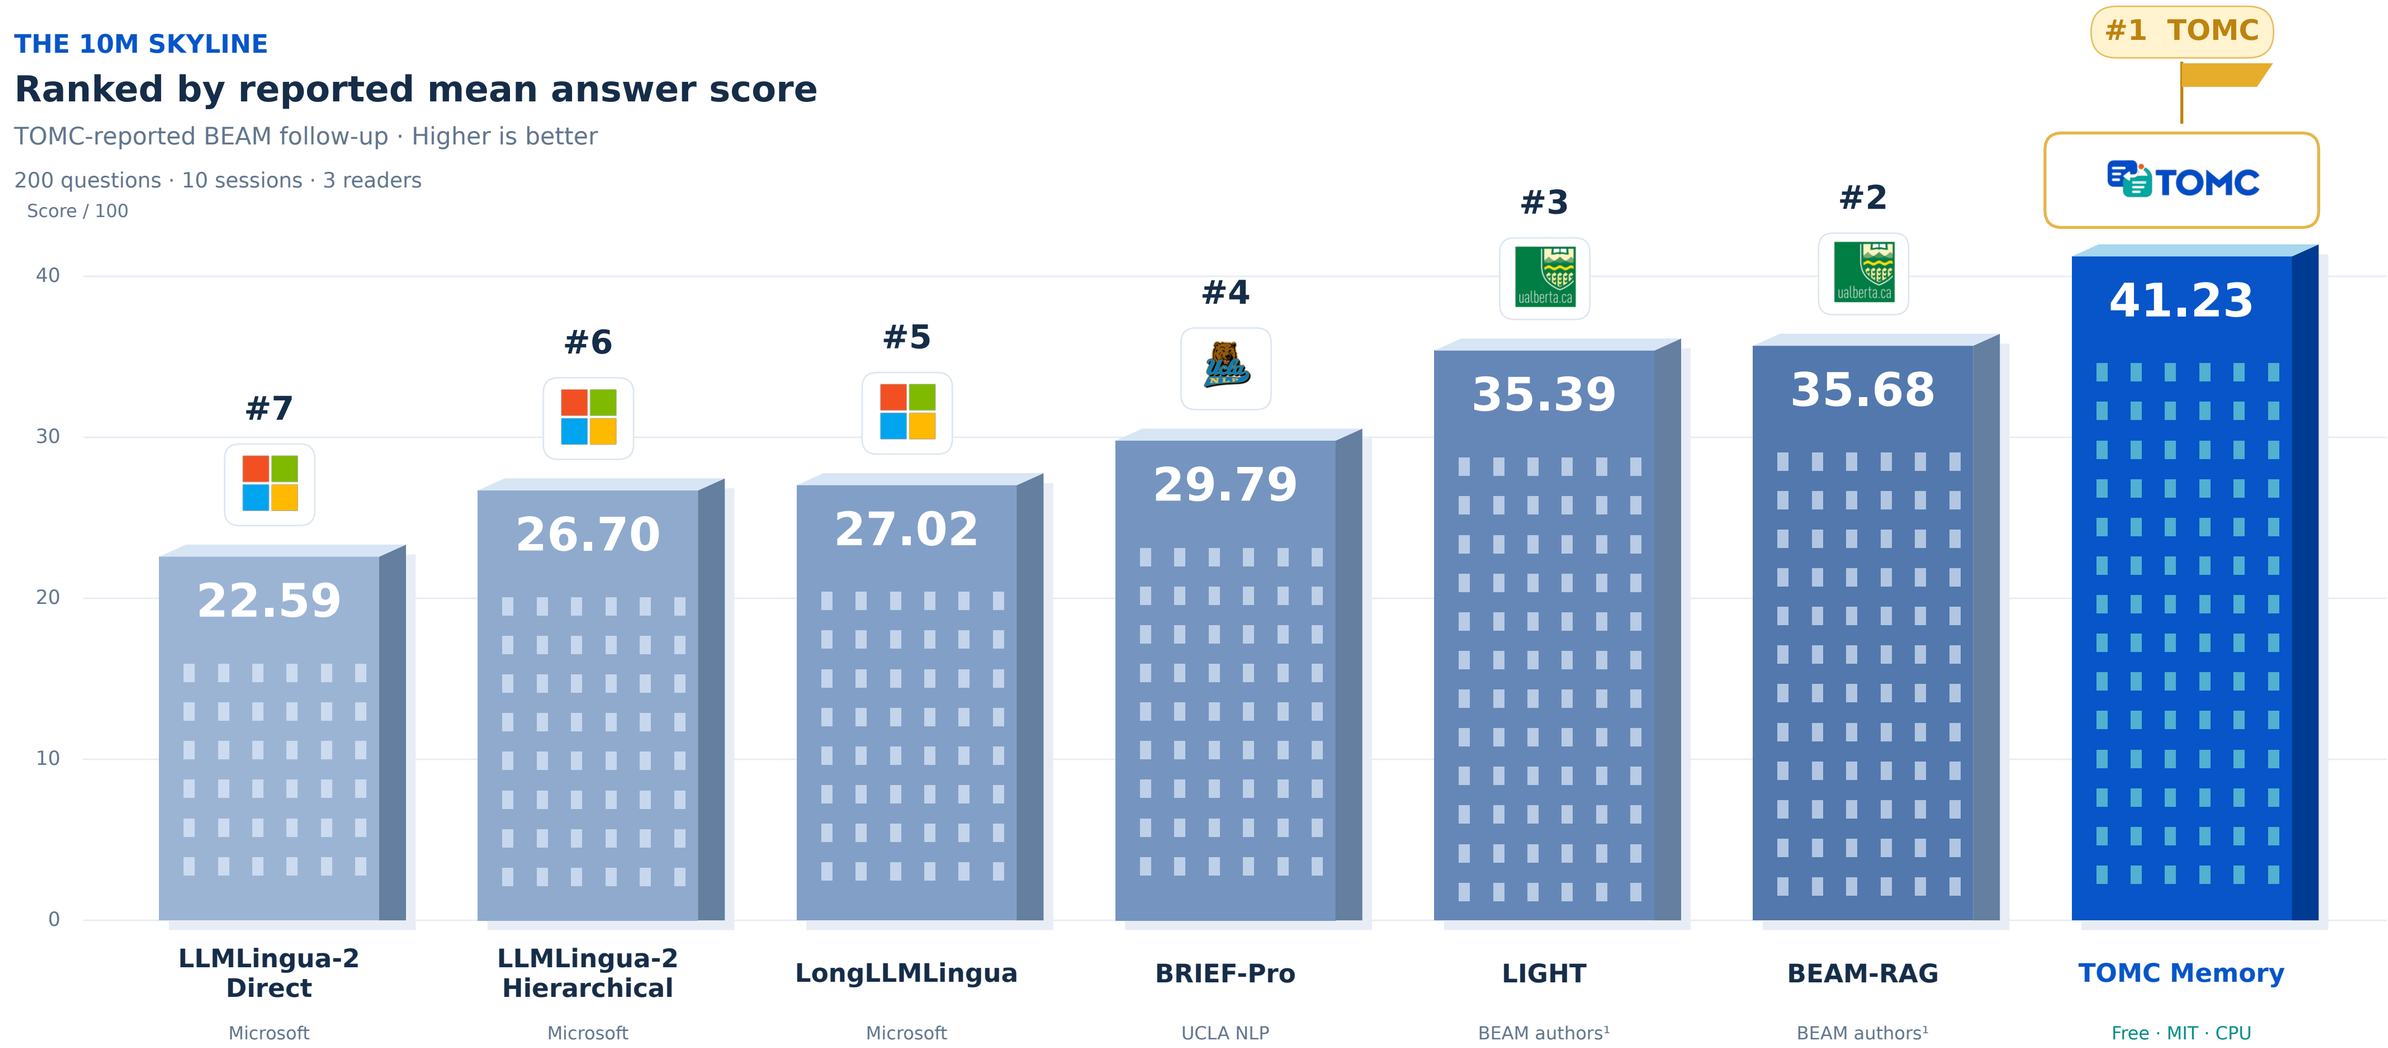

7 evaluated configurations / 31 ecosystem entries

THE 10M SKYLINE

Ranked by reported mean answer score

TOMC-reported BEAM follow-up · Higher is better

200 questions · 10 sessions · 3 readers

Ranks describe this reported paired-rubric evaluation only; they are not an all-tools leaderboard.

FREE + OPEN SOURCE

MIT-licensed software; model/API costs are separate.

18 / 18 HIGHER MEANS

Across the 3 readers × 6 paired baseline comparisons.

41.99% LESS INPUT

Mean reader-input reduction vs LIGHT in this evaluation.

THE CONTEXT ENGINEERING CITY

31 projects, platform features and references · Grouped by function; no performance rank assigned below.

01 MCP SCHEMA + DISCOVERY

- Atlassian MCP Compressor
- slim-mcp
- Token Smithers
- Bifrost Code Mode
- Cloudflare MCP Portal
- Anthropic Tool Search

02 TOOL OUTPUT COMPRESSION

- context-mode
- Headroom
- sqz
- mcp-trunc-proxy
- compressmcp
- context-compress
- Token Optimizer MCP
- SuperCompress

03 CODE, DOCS + CLI

- jCodeMunch
- jDocMunch
- Token Saver
- RTK

04 LONG CONTEXT + AGENT MEMORY

- **TOMC Memory**
- LLMLingua / LongLLMLingua / LLMLingua-2
- LightMem
- Mem0
- Letta / MemGPT
- OpenViking
- Graphiti
- billion-context

05 PLATFORM-NATIVE COMPACTION

- OpenAI Compaction
- Claude Context Management / Compaction

Provider features

Shown separately from third-party tools.
Availability and cost depend on the provider.

06 COLLECTIONS + RESEARCH

- Awesome LLM Token Reduction
- Context Engineering Tools
- Token Reduction Is Not Cost Reduction (2026)

A reading list, not benchmark competitors.

Score = reader-balanced mean × 100. TOMC averages 18 paired cells; each baseline averages its 3 reader cells. 3,596 valid pairs.

[1] BEAM: University of Alberta, UMass Amherst and Amii (Alberta mark shown). Other marks: project, organization, maintainer or publication host.
